Author Index Volume 64 (1991)

Akiyama, T., 247
Albers, J.H.M., 121
Alwattari, A.A., 41, 55
Asaka, K., 153, 163
Asami, K., 153, 163

B. Nagy, O., 129
Bae, Y.H., 283
Bai, J., 263
Bordogna, L., 229

Chen, A., 263

Di Landro, L., 229
Dimov, A., 183

Farkova, J., 103
Feijen, J., 283
Feil, H., 283
Fouda, A., 263

Hanai, T., 153, 163
Higa, M., 225
Hwang, S.-T., 69

Kim, S.W., 283
Kim, S.S., 1, 13, 31, 41
Kinzer, K.E., 1
Komiyama, J., 247
Kotzelski, J., 173
Kusters, A.P.M., 121

Lee, Y.M., 145
Lim, G.B.A., 31, 41
Lloyd, D.R., 1, 13, 31, 41, 55

Matsubara, Y., 163
Matsuura, T., 263
McHugh, A.J., 81
Misra, S.K., 93
Miyasaka, K., 255

Nair, S.G., 69
Nakajima, M., 273
Nakanishi, T., 247
Nawa, Y., 273

Ohtani, T., 273
Ovchinnikov, V.V., 237

Pegoraro, M., 229
Petkova, P., 183
Petrov, S., 183
Petrova, S., 183

Satoh, M., 247
Seike, T., 247
Shin, E.M., 145
Shulka, J.P., 93
Smid, J., 121
Staude, E., 173
Szpakowska, M., 129

Tanioka, A., 225
Tsay, C.A., 81

Ulbricht, M., 173

Valleton, J.-M., 113
Volkov, V.V., 191

Wang, Y.F., 31, 41
Watanabe, A., 273

Xie, W., 113

Yampol'skii, Yu.P., 191
Ye, Q., 31

Zhao, K., 153, 163

Subject Index Volume 64 (1991)

Asymmetric membranes, 191

Bias-voltage effect, 153, 163

Calcium ion transport, 69
Charge density, 255
Charged membranes, 247, 255
Chitosan membranes, phosphorylated, 145
Composite membranes, 191
Concentration polarization, 153, 163
Copper transport, 129
Crystallization kinetics, 55

Dielectric relaxation, 153, 163
Diffusion, 81, 93, 129, 283
Dynamically formed membranes, 273

Electrical conductivity, 247
Electrodialysis, 153, 163

Facilitated transport, coupled, 129
Facilitated transport, 93, 129
Fine Zr particles, 273
Free volume, 191

Gas and vapor permeation, 121, 229
Gas separations, 121, 263

Hollow fibre membranes, 121
Hollow fibers, 191
Hydrogels, 113, 283

Invertase, 173
Ion permeation, 255
Ion-exchange membranes, 113, 153, 163
Isotactic polypropylene membranes, 13

Liquid membranes, 69, 93, 129

Membrane electrode, 69
Membrane modules, 103
Membrane potential, 225
Membrane preparation and structure, 1, 13, 31, 41, 55, 81, 121, 183, 273
Membrane-bound enzymes, 113, 173
Microporous membranes, 1, 13, 31, 41, 55

Nuclear track membranes, 237

Oxygen enrichment, 191

Pervaporation, 145
Phase separation, liquid–liquid, 1
Phase separation, thermally-induced, 1, 13, 31, 41, 55
Poly(2,6-dimethyl-1,4-phenylene ether) membranes, 121
Poly(ethylene terephthalate) membrane, 237
Poly(N-isopropylacrylamide-co-butylmethacrylate 95:5mol%) membrane, 283
Poly(vinyl alcohol) membranes, 247
Polyacrylonitrile membranes, 183
Polydimethylsiloxane/polyethersulfone membrane, 263
Polyether–polyurethane membranes, 229
Polypropylene, 55

Scanning electron microscopy, 55
Separation of water–ethanol mixtures, 145
Separation of water–methane, 229
Skin, 81
Skin layer thickness, 121
Solute separation, 283
Spacer orientation, influence of, 103
Structure deformation, 237
Substituted polysulfone, 173
Supported liquid membrane, 69
Swelling, 113

Theory, 81, 103, 263
Thermosensitive membrane, 283
Track-etched membranes, 237
Transport kinetics, 129
Tributyl phosphate, 93

Ultrafiltration, 173, 183, 273
Uranyl ion transport, 93

Water transport, 229
Wheatstone-bridge model, 263

Zirconium, 273
